OVERVIEW

A discreet portfolio of *high-conviction* investments

The following is a curated selection of opportunities spanning both high-conviction investments and select experiential offerings — reflecting a broader philosophy of access to exceptional opportunities across both capital and lifestyle.

The investment opportunities presented have been carefully selected for their potential to deliver asymmetric return profiles, supported by identifiable catalysts and clear pathways to value realisation.

A number of these investments are positioned around near- to medium-term liquidity horizons, driven by commercial milestones, strategic interest, or structured secondary events.

The emphasis is not solely on return magnitude, but on the combination of probability, timing, and access — transactions not broadly available to the market.

Tom Jelinek brings 18+ years of senior experience across wealth management, private markets, and advisory — with a focus on identifying asymmetric opportunities supported by disciplined selection and strong networks.

StorONE

Tier 1 performance at Tier 2 cost

≥5x

~12 months · Acquisition

×

THE OPPORTUNITY

A next-generation enterprise data storage platform solving structural inefficiencies in global data architecture. Rising flash storage costs are forcing enterprises to rethink how data is stored and managed.

KEY HIGHLIGHTS

- Founded by serial entrepreneur Gal Naor; backed by John Thompson (ex-Microsoft Chairman) and Ed Zander (ex-Motorola & Sun Microsystems)
- Up to 75% cost reduction versus traditional architectures
- Proprietary auto-tiering technology optimising data placement dynamically

— Established enterprise traction with global deployments and a strong partner ecosystem

— Q1 2026 matched full-year 2025 sales — profitability expected Q2 2026

— Three licence renewals secured in March 2026, reinforcing recurring revenue strength

INVESTMENT CASE

A timely infrastructure solution aligned with a structural market shift, where cost efficiency is becoming mission-critical.

Cambridge Medical Technologies

The bloodless blood test

~3x

~12 months · Secondary

×

THE OPPORTUNITY

A clinical-grade, non-invasive biosensor platform enabling real-time monitoring of biomarkers without blood extraction. Healthcare is transitioning from episodic diagnostics to continuous, predictive monitoring.

KEY HIGHLIGHTS

— Non-invasive biosensor delivering continuous, real-time physiological data

— Validated in Harvard-affiliated clinical trials across multiple biomarkers

— Demonstrated accuracy comparable to traditional blood testing

— Platform capable of expanding across a wide range of biomarkers

— Addressable markets exceeding $60 billion

INVESTMENT CASE

A potentially category-defining diagnostic platform, with applications spanning healthcare, longevity, and personalised medicine.

Atlas Consolidated (HugoHub)

Re-architecting banking infrastructure

~15x

~36 months · Acquisition/IPO

×

THE OPPORTUNITY

A full-stack, AI-enabled bank-in-a-box platform enabling financial institutions to launch and scale digital products rapidly. Banks face declining margins, legacy constraints, and rising competition from technology-native challengers.

KEY HIGHLIGHTS

- Reduces infrastructure and operational costs by 50–75%
- No-code architecture enabling rapid product deployment
- ARR of USD 4.5m — 200% increase in under 12 months
- Exposure to ~$600bn global banking technology spend
- Multi-award-winning platform with near-term monetisation from existing operating assets

INVESTMENT CASE

A core infrastructure play within financial services, positioned at the convergence of AI, embedded finance, and digital transformation.

Advanced Material Development

Smart materials. Transformative applications.

~10x

2–3 years · Licensing

×

THE OPPORTUNITY

A deep-technology platform developing proprietary smart materials — graphene-based conductive inks and photonic crystal polymers — for healthcare, logistics, and advanced manufacturing. Up to 50% of vaccines are lost due to cold-chain failures.

KEY HIGHLIGHTS

- Dual innovation engine combining graphene conductivity with optical sensing
- Capital-light licensing model enabling global scalability
- Exclusive long-term licensing agreement secured with a major packaging group
- Active engagement with GSK and Eli Lilly

INVESTMENT CASE

A platform technology with recurring royalty economics, at the intersection of materials science, healthcare, and global logistics.

MODEL	Royalty licensing

Aspire Intelligence

The operating system for the modern family office

~25x

~48 months · Acquisition

×

THE OPPORTUNITY

A secure, AI-native platform as the system of record for family offices — incorporating biological capital, travel & lifestyle, and next-generation support. An $84 trillion generational wealth transfer is underway on fragmented infrastructure.

KEY HIGHLIGHTS

- Purpose-built infrastructure for complex wealth ecosystems with full data isolation
- Addresses succession, cybersecurity, and institutional memory risks
- Integrated biological capital layer — health, longevity, and performance optimisation
- Curated lifestyle and experiential platform including travel and bespoke experiences
- Dedicated next-generation support for continuity and education

INVESTMENT CASE

A foundational infrastructure layer for wealth management, solving a critical and under-addressed problem at the apex of the market.

Unlocking liquidity from music rights

7.5–10%

5yr · Yield / ABS

×

THE OPPORTUNITY

A specialised financing platform providing advances against music royalty streams — enabling rightsholders to access future income today while retaining full ownership. Global music revenues projected to reach ~$155bn by 2030.

KEY HIGHLIGHTS

- Advances secured directly against underlying music rights portfolios
- Rightsholders retain full ownership — no forced catalogue sales
- Rapid underwriting and funding, typically within days
- Transparent, non-compounding cost structure with predictable cash flows
- Data-driven valuation engine with automated processing
- Music royalty ABS markets: sub-1% historical default rate (c.0.44% over ~20-year period)

INVESTMENT CASE

A yield-oriented strategy backed by real, contracted cash flows — combining predictable income, strong collateralisation, and structural growth in global music consumption.

TARGETED YIELD	7.5–10% p.a.
DEFAULT RATE	Sub-1% historical
HOLDING PERIOD	5-year instruments
LIQUIDITY	Tradable (ISIN assigned)
